## TURBINE DRINKS CABINET

### Bar & Drinks Cabinets

The Turbine drinks cabinet takes its shape from the details of fighter jet engines. Each level is comprised of its own exterior rotating portal constructed of glass blades, redolent of the fan rotors and compressor rotors of a jet turbine engine. Each level is also equipped with an internal rotating turntable for your favourite drinks and glasses, echoing the rotary components of these supersonic engines. The entire drinks cabinet is then lit up by its internal light sources to create a glowing effect like a red-hot jet engine about to break the sound barrier, and topped with an infinity mirror effect on the surface to project the illusion that everything is being pulled into the turbine.

### SPECIFICATION

|           |                           |
|-----------|---------------------------|
| Product   | M-OTA-OC-0001-A           |
| Code:     |                           |
| Product   | 133cm / 52"               |
| Height:   |                           |
| Product   | 66cm / 26"                |
| Width:    |                           |
| Product   | 65cm / 26"                |
| Depth:    |                           |
| Weight:   | 225kg / 496lbs            |
| Max       | 35W                       |
| Wattage:  |                           |
| No. of    | 1560mm: 1pcs 1250mm: 3pcs |
| Bulbs:    | and 1650mm: 1pcs          |
| Bulb      | Yes                       |
| Included: |                           |
