RIDGE BOOKCASE

Bookcases

The stoic Ridge bookcase is a more contemporary twist on a vintage material, handcrafted from Genuine English Reclaimed Timber, up to 100 years old and collected from disused buildings in the UK. The salvaged timber is denailed by hand and repurposed for its next chapter, rich with the inimitable patina from its past life. With strong sturdy edging echoing a mountain ridge, the Ridge's clean lines and naturally weathered texture bring an instinctive sense of warmth and character to a room. Wide hinged sides reveal concealed shelves to store secret treasures.
