XYLEM BURNTWOOD WITH LED

Side Tables

Created using salvaged driftwood logs that have been collected by hand from beaches all over the world, each piece uniquely marked by swathing tides and weathered shores. Crafted over many hours in a painstakingly delicate process, the once forgotten wood is suspended within crystal-clear acrylic, each tiny bubble like a last breath of air before being frozen in time. Evocative of sizzling campfires on the beach, the Burntwood finish is achieved by carefully charring the wood by hand. An LED pad at the base of the table creates a soft glow, accentuating the details of the wood.
